ABOUT

Highly motivated Full-Stack Developer blending deep C++/C# engineering principles with modern Next.js expertise. Proven ability to architect and deploy high-performance, secure applications that drive business growth.

EXPERTISE

- Full-Stack Architecture
- Performance Optimization
- API + Backend Development
- Agile Project Management
- SEO & Digital Marketing Strategy

LANGUAGE

- English (Fluent)
- Urdu (Native)

WORK EXPERIENCE

Freelance Full-Stack Developer & Designer
Lahore - Pakistan
2024 - Present

Genius Mart & AJ Collections E-commerce Platforms

- Architected and developed two full-stack e-commerce applications using Next.js, resulting in Lighthouse performance scores of 95+.
- Engineered secure backends with Supabase and PostgreSQL, managing user authentication, product databases, and order processing.
- Successfully integrated third-party payment APIs (Stripe, JazzCash) to enable seamless and secure online transactions.

Admin & User Management Dashboards

- Designed and built intuitive, data-driven dashboards for SaaS and e-commerce applications, enabling efficient management of users, products, and analytics.
- Utilized React and Ant Design to create responsive, enterprise-grade user interfaces for complex data visualization and manipulation.
- Provided graphic design and SEO services, creating complete brand identities and enhancing online visibility for clients.
